ABOUT
PRAKHAR SINGH

Prakhar Singh is an 18-year-old student with a passion for STEM and a mission to make his community a better place. He utilizes his coding and media skills to create websites, apps and marketing plans for local businesses and organizations. Most notably, he developed a website for the Agency on Aging and offered professional development training for the employees to learn tools like Microsoft Word and PowerPoint to assist them in their work.

Nationally, Prakhar has been commended for his talents and capabilities. He serves on the Youth Advisory Council for Common Sense Media, an organization dedicated to making the internet safer, more equitable and empowering for kids, families and communities. He's also won many awards like the College Board National Rural and Small Town Award, the 2023 American Marketing Association Pittsburgh Collegiate Marketing Competition and a scholarship to attend the Pennsylvania Governor's School for the Sciences at Carnegie Mellon University.

Prakhar is also a leader at his school where he serves on the robotics team as lead engineer and programmer. In addition to attending competitions, Prakhar also teaches younger students about robotics and coding, introducing them to the endless possibilities and opportunities in the STEM field.
